

There's an alternative to warfarin
for people who need one.

IT'S CALLED
WATCHMAN™

See what makes this one-time procedure an effective
option for reducing stroke risk in people with AFib
not caused by a heart valve problem.

See how WATCHMAN works at WATCHMAN.com

There are risks associated with the WATCHMAN Implant, including internal bleeding and stroke, and in rare cases it can be fatal. Talk to your doctor so you thoroughly understand all the benefits and risks of WATCHMAN to see if it's right for you.
