

Take control of your AFib-related stroke risk

Did you know that strokes are the most common complication of AFib?¹

1 out of 3 people with AFib will have a stroke in their lifetime²

5x higher stroke risk in people with AFib vs. people with a regular heartbeat¹

Many people take blood thinners to reduce the risk of stroke related to AFib, but did you know there is an alternative?

**It's called the
WATCHMAN Implant.**
